Meteorologist's View

Some difficult conditions in the east with quite extensive hill fog and frequent snow showers coupled with severe wind chill at height.

Forecast for Monday 05 Dec 2022

Weather: Mainly cloudy with further showers, these always focused across the east and wintry above around 500m, but gradually dwindling through the afternoon and evening.

Maximum wind: East mean 20-25mph with gusts reaching 35mph across most exposed ridges and summits, easing gradually from mid-morning, also backing to the north late in the day.

Chance of cloud-free hill tops above 800m: Initially 70% in west, 10-20% in east, becoming by early evening 90% in west, 60% in east

Low cloud and visibility: Good becoming moderate or poor in rain showers, very poor in snow showers and within cloud with bases initially quite extensive in east and occasional in west from 500m, improving later as showers ease.

Temperature: **Valleys:** Zero Celsius increasing 9 Celsius during the afternoon
At 800m: Minus 1-2 Celsius
Freezing level: 600-700m

Mountain Weather Forecast

Ground Conditions Supplement

Date: Saturday 3 December Location: Helvellyn summit at 12:05 Temperature: minus 1.5C Maximum wind speed 21.3mph Wind chill: minus 10.1C Average wind speed: 16.5mph. Full report: A cold day with cloud clinging to the higher fells for much of the day but with bright spells for many parts of the region. The Lakeland fells are currently snow-free, however, subzero temperatures overnight and freezing conditions throughout the day on the higher fells today meant that ground frost was present above roughly 800m and rime ice was also beginning to form on cold windward surfaces. Snow flurries also came and went during the afternoon. Striding and Swirral edge were in good condition today with mostly dry rock underfoot, and the frost and rime ice not adding to the difficulties significantly. It should be noted that the summit temperature today was around -1.5C so any precipitation falling overnight is likely to fall as snow over high ground. The windchill (feels-like) temperature was around -10ºC today making it feel extremely cold for anyone stood still for too long and/or inadequately dressed.
